

RBS 35 Concentrate

35CONC(5.02)AFP - 09/02/2022

Multipurpose concentrated foaming alkaline liquid cleaning agent

For manual, soaking and ultrasonic cleaning in laboratories and industry

- High detergency power
- Insensitive to water hardness
- Total rinse
- Cost-effective

Processes of use Applications

RBS 35 CONCENTRATE is used in laboratories for removing organic and mineral residues, distillation residues, fats, ointments, cell cultures ... It allows efficient cleaning of glassware and equipment made of plastic, porcelain, ceramic, quartz, stainless steel ...

In industry, it is used as a technical product for high performance cleaning and degreasing of metal parts, moulds, lenses, glass, silicon wafers ...

Use instruction and concentration

Diluted in tap water, RBS 35 CONCENTRATE allows prolonged soaking without risk of calcareous deposits. It can be used for manual and ultrasonic cleaning.

Dilute 20 ml of RBS 35 CONCENTRATE per litre of distilled or tap water (preferably at 50°C). In case of soaking, immerse completely the items to be cleaned to ensure optimal contact with the cleaning solution. Rinse immediately with tap water, or better, with deionized water. RBS 35 CONCENTRATE is easily and totally eliminated without leaving any traces or invisible film. Remark: an increase of the concentration or the use of an ultrasonic bath may be of help in case of stubborn soils.

Physical and chemical properties

White foaming liquid with a neutral smell

- pH 100%: 13.2
- pH sol 2 % v/v: 11.5
- Density at 20°C: 1.07

Safety and advice

Do not mix with other products. Do renew baths frequently to ensure a constant efficiency (the first weakening indications are a decrease in pH and absence of foam). RBS 35 CONCENTRATE being alkaline, it is not recommended for cleaning white metals. Read the Safety Data Sheet before use. Storage

Ingredients

- Anionic and non-ionic surfactants
- Phosphates, polyphosphates
- Chlorinated agents
- Sodium hydroxide

Pack size available

5 L bottle
Available in carton of 4 x 5 L
20 kg drum
